

Dimer Connectors

Diagram illustrating the connection of two 17-pin connectors (Cam_G1+06 and Cam_G1+05) to a 3V3 power source. The connectors are shown with pins numbered 1 to 17. The 3V3 source is connected to pin 17 of both connectors. The GND is connected to pin 1 of both connectors. The diagram also shows a crossed connection between the two connectors, labeled Cam_G1+03_P10, which is crossed out with a red X, indicating it is not the correct connection.
